PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in Java, Spring Boot, Python, and React.js, building RESTful APIs, JWT-secured applications, and real-time IoT analytics dashboards. Currently at iESG Labs, Pune, developing the Vidyutt.io platform: MQTT ingestion of temperature and CO2 telemetry, InfluxDB time-series storage, Python/FastAPI backend APIs, and React dashboards for 50+ industrial sensors in an Agile/Scrum team. Skilled in Spring Security, Hibernate ORM, MySQL, Role-Based Access Control (RBAC), MVC architecture, and Data Structures & Algorithms.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3
Backend: Spring Boot, Spring MVC, Spring Security, Hibernate ORM, RESTful APIs, JWT Authentication, Microservices, JDBC, FastAPI, JUnit, Maven
IoT & Data: MQTT, InfluxDB (time-series), Real-Time Data Ingestion
Frontend: React.js (Hooks, React Router v6, State Management), Tailwind CSS, Bootstrap, Thymeleaf, Responsive UI
Databases: MySQL, PostgreSQL, InfluxDB
Cloud & DevOps: AWS (Basics), Docker, Git, GitHub, Agile/Scrum, JIRA
Tools: Postman, MySQL Workbench, VS Code, Eclipse IDE
Core Concepts: OOP, MVC Architecture, Data Structures & Algorithms (DSA), Unit Testing

PROFESSIONAL EXPERIENCE

Full Stack Developer (Trainee) | iESG Labs Private Limited, Pune **Dec 2025 – Present**

- Built a **Python** MQTT subscriber service ingesting real-time **temperature and CO2** telemetry from **50+ industrial IoT sensors** and storing it as time-series data in **InfluxDB**.
- Developed **Python/FastAPI** REST endpoints that query InfluxDB for live and historical Temperature, CO2, Water Meter and Feeder Temperature readings, with time-range and sensor filters.
- Developed responsive React.js and Tailwind CSS dashboards turning telemetry from 50+ sensors into live insights across **3 modules** (Boiler, CCTV, Fire Panel).
- Built a reusable component library with React functional components and Hooks; implemented nested routes and Outlets with React Router v6, improving state persistence across dashboard views.
- Integrated RESTful APIs for real-time data synchronization; achieved 100% mobile responsiveness with utility-first Tailwind CSS.
- Worked in an Agile/Scrum team using Git, GitHub, and JIRA for version control and sprint tracking.

Full Stack Development Training (Java, Spring Boot, React.js) | KodNest, Bangalore **Aug 2024 – Mar 2025**

- Developed full-stack applications with Java, Spring Boot, MVC architecture, and RESTful API design for scalable backends.
- Applied Spring Security with JWT authentication to protect user data and CRUD operations.
- Designed relational schemas in MySQL with Hibernate ORM, ensuring data integrity and optimized query performance.
- Built responsive React.js and Tailwind CSS frontends; validated APIs with Postman and managed code with GitHub.

PROJECTS

Vidyutt.io – Industrial IoT Analytics Platform **Dec 2025 – Present**

Tech Stack: React.js, Tailwind CSS, Python, FastAPI, MQTT, InfluxDB, REST APIs, Git, GitHub

- Designed an end-to-end IoT data pipeline: **Sensors > MQTT > subscriber > InfluxDB > FastAPI REST > React dashboard** for 50+ industrial sensors.
- Ingested live temperature and CO2 readings over MQTT topics and stored them in InfluxDB for real-time and historical trend analysis.
- Built backend REST APIs to fetch time-series data from InfluxDB with filters (time range, sensor, module) for Boiler, CCTV, and Fire Panel dashboards.
- Integrated asynchronous APIs with state management and dynamic filters; improved component reusability by 25% using React Router v6 nested Outlets.

LearnSphere – E-Learning Platform **May 2025 – Sep 2025**

Tech Stack: Spring Boot, Java, Spring Security, MySQL, React.js, HTML, CSS, JavaScript

- Developed a full-stack e-learning system on Spring Boot MVC covering student-trainer interaction and the course lifecycle.
- Implemented Role-Based Access Control (RBAC) with Spring Security for 3 roles: Admin, Trainer, and Student.
- Delivered a responsive multi-device UI with React.js and JavaScript covering all educational modules.

EDUCATION

B.E. in Computer Science & Engineering – Bheemanna Khandre Institute of Technology, Bhalki **Sep 2020 – Jun 2024**
Visvesvaraya Technological University (VTU), Belagavi | CGPA: 7.71

Pre-University (PCMB) – Science | 94% **Jul 2018 – May 2020**

Secondary School (SSLC) – Karnataka State Board | 83.84% **2018**

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** Java (Basic) and SQL (Basic), HackerRank; Full Stack Development, KodNest; TCS iON Career Edge.
- Solved 50+ LeetCode problems across Arrays, Strings, Dynamic Programming, Binary Search, and Sorting.
