PRADEEP SAVARE

Full Stack Developer • Java | Spring Boot | React.js
pradeepsaware1@gmail.com | +91-8618255944 | Pune, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with expertise in building scalable, high-concurrency web applications using **Java** and **Spring Boot**. Specialist in developing responsive, performance-driven frontends with **React.js** and **Tailwind CSS**. Proven track record at **iESG** of implementing secure **RESTful APIs** and managing version control via **GitHub** within an **Agile** environment. Focused on **Clean Architecture** and delivering optimized, production-ready code for enterprise-level product innovation.

TECHNICAL SKILLS

Languages	Java, Python, JavaScript , HTML5, CSS3, MySQL
Backend	Spring Boot, Hibernate ORM, REST APIs, Spring Security, JWT Auth, Maven, JDBC, JUnit
Frontend	React.js, Tailwind CSS, Thymeleaf, Responsive UI Design
Cloud & DevOps	AWS (basics), Git, GitHub, Agile / Scrum
Tools	Postman, MySQL Workbench, VS Code, Eclipse IDE, Spring Tool Suite, JIRA, MS Excel, Power BI

PROFESSIONAL EXPERIENCE

Full Stack Developer (Trainee) | iESG, Pune *Dec 2025 – Present*

- **Architected responsive dashboards** using **React.js** and **Tailwind CSS**, transforming raw sensor data into actionable visual insights for industrial utility monitoring.
- **Build a modular component library** using **React Functional Components and Hooks**, enabling high reusability for systems like Boiler telemetry, CCTV feeds, and Fire Panels.
- **Engineered complex UI navigation** using **React Router (v6)** with nested routes and outlets, improving application flow and state persistence across dashboard views.
- **Integrated RESTful APIs** for real-time data synchronization, ensuring seamless rendering of live sensor telemetry for Water Meters and Feeder Temperatures.
- **Improved frontend performance** by implementing utility-first styling with **Tailwind CSS**, reducing custom CSS overhead and ensuring 100% mobile responsiveness.

Full Stack Developer (Training) | KodNest, Bangalore *Jul 2024 – Mar 2025*

- **Developed full-stack web applications** using **Java** and **Spring Boot**, implementing **MVC architecture** and **RESTful API** design for scalable backend services.
- **Created secure authentication systems** using **Spring Security** and **JWT (JSON Web Tokens)**, ensuring protected access to sensitive user data and CRUD operations.
- **Designed relational schemas** using **MySQL** and **Hibernate ORM**, focusing on data integrity, table relationships, and efficient query performance.
- **Built dynamic, responsive frontends** with **React.js** and **Tailwind CSS**, utilizing **State Management** and **Props** to create interactive user experiences.
- **Streamlined development workflows** using **Maven** for dependency management and **GitHub** for version control, collaborative coding, and conflict resolution.
- **Validated API endpoints** using **Postman** and followed **Agile/Scrum** methodologies to deliver project milestones within defined sprint cycles**.**

PROJECTS

LearnSphere – E-Learning Platform | Tech: *Spring Boot, Java, MySQL, Thymeleaf, HTML/CSS/JS*

- **Architected an enterprise-grade E-Learning system** using **Spring Boot** and **MVC architecture**, supporting seamless student-trainer interactions and course lifecycle management.
- **Implemented Role-Based Access Control (RBAC)** using **Spring Security**, defining distinct permissions for Admin, Trainer, and Student modules to ensure data privacy.
- **Improved dynamic frontend views** with **Thymeleaf** and **JavaScript**, ensuring a responsive, multi-device user experience across all educational modules.

Vidyutt.io – Industrial IoT Analytics Dashboard | Tech: *React.js, Tailwind CSS, JavaScript, REST APIs, Git*

- **Designed a high-performance analytics dashboard** using **React.js** and **Tailwind CSS**, visualizing real-time telemetry from 50+ industrial IoT sensors (Boiler, CCTV, Fire Panels).
- **Integrated asynchronous RESTful APIs** to fetch and render live data streams, implementing **State Management** and **Dynamic Filters** for granular data analysis.
- **Enhanced application architecture** using **React Router (v6)** with nested outlets, enabling modular navigation and improving component reusability by **25%**.
- Structured routing with nested outlets for modular navigation; contributed to codebase collaboration using Git/GitHub.

EDUCATION

B.E. in Computer Science & Engineering *Sep 2020 – Jun 2024*
Bheemanna Khandre Institute of Technology, Bhalki (VTU) • CGPA: 7.71

Pre-University (PCMB) – Science *Jul 2018 – May 2020*
Diamond Independent PU Science College, Bhalki • 94%

Secondary School (SSLC) *2018*
Shivaji High School, Bhalki – Karnataka State Board • 83.84%

CERTIFICATIONS & TRAINING

- Java Full Stack Development – KodNest, Bangalore (2024–25)
- Spring Boot + React.js – Hands-on project training covering enterprise-grade patterns

KEY HIGHLIGHTS

- Scored 94% in Pre-University Science Board Exams — demonstrates strong analytical foundation.
- Independently learned and applied full-stack technologies through structured training and real-world projects.
